required to know your silt/sand/clay ratio.

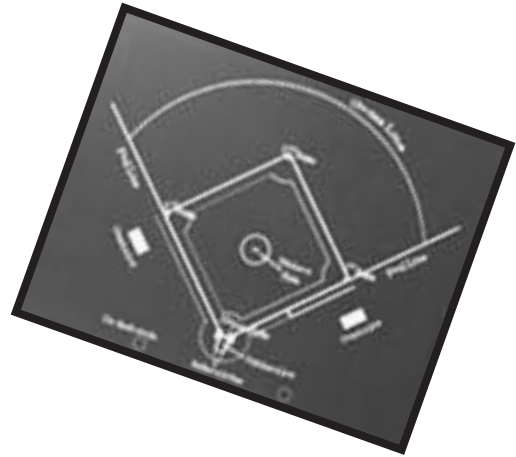

Infield Problems?

We Know that every athletic field is unique

WITH THE RIGHT PRESCRIPTION

YOUR FIELD CAN BE CURED!

Conserv FS Has The Fix!

No need to Go back to the Drawing Board!

Blend the right mix of materials
RIGHT INTO YOUR EXISTING SOIL

Engineered Infield Mixes Do the Trick!

Reduce Rain-outs

3-D Renovation

A Lasting Solution!

3-D Renovation is a process that cures your field of standing water; the enemy of that keeps your field from being safe, dry and playable after rain. Our unique, three dimensional process prepares your field to manage water and provides a pliable playing surface for your teams game after game - season after season.

Conserv FS provides the latest technologies in engineered soils and proven water management processes so you can remain the MVP of each game played on all of your diamonds.

Conserv FS Marking Paint®

Our economy athletic field marking paint offers you an easy to pour and apply paint that mixes at a 50/50 rate. It is long lasting, will not harm Turf, Uniforms or Athletes.

Hand Cord Reel With Lining Cord & Spikes

Super strong polyester lining string, 8 aluminum turf spikes.

Unbeatable value pack combination of products. Use to line up your game & practice fields!

Item No. 430786

8" Ground Socket

For use with all kits.

Item No. 431005

I Go Striper!

- High pressure system for consistent application of paint.
- Pre-drilled spacer holes for easy and simple line width changes
- Extendable front forks for even more flexibility
- Removable battery easily for flexible re-charging options
- Easy accessibility to all parts allows for simple maintenance

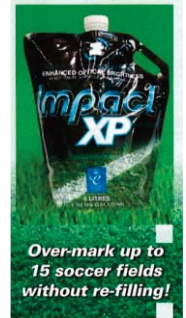

Striper, Item # 535406

Hand Spray Lance, Item # 435404

Impact XP: For use with the I GO Striper

It's In the Bag!

- Ready-to-use highly concentrated liquid paint.
- NO water, No mixing, No Pouring
- Will Over-mark a standard soccer field from .26 gallons per field!
- Marks out both grass and hard surfaces
- Surface dry with in 10 minutes in normal conditions

Item # 435401

Jiffy Model 5000

- Big in versatility, handles all athletic field and pavement striping jobs equally well.
- Brass spray system eliminates rusting
- 3 1/2 HP Briggs and Stratton engine powers a trouble-free diaphragm compressor, which produces 3.2 CFM @ 40 psi
- Large 7 gal stainless steel tank for less refills and easy cleanup
- Easy-to-clean filter system eliminates time Consuming clogging

Item #435201

Or, NEW with 12 gal tank:

Item #435199

FIELD MARKING, PAINT & STRIPERS

ALL PRO PLUS Athletic Field Marking Chalk

Our All Pro Plus Super Bright chalk is the whitest compound available! It will even stand out on crushed limestone. Made from the highest quality calcium carbonate (marble dust), All Pro is completely safe for players, equipment and turf. Conforms to all safe-use requirements of the consumer safety act, NCAA & NFSA official rules and all known Little League rules for athletic marking materials. It comes packaged in 50 lb. bags. One 50 lb. bag of chalk will stripe approximately 300' of a 3" wide and 1/16" thick line.

- Specially formulated blend of crushed white calcium carbonate
- Ideal for use as a line marker for any outside sports activities where lines must be visible to players, spectators and officials
- Non-irritating to eyes & skin. Will not harm soil or vegetation

Marking Chalk - Item #435160

TURFACE - SAVE THE GAME!

Fights Infield Compaction!

Holds Moisture in the Soil!

Gives Grass Roots Room to Grow!

- **Makes slippery conditions a thing of the past!**
- **Will not cake up!** so your field will not become rock-hard.
- **Stays part of your infill mix** to do the job over and over again!

Item # 434503: Turface Quick Dry

- **Fights infield compaction** that leads to injury
- **Holds moisture** & nutrients in soil
- **Increases drainage** as a result of balanced air & water pore space
- **Absorbs its weight in water!**
Play Resumes Quickly!

Item # 434500: Turface MVP

- **Flows easily into aerification holes!** Smaller, consistent particles
- **Saves the Game** by preventing slick & muddy conditions
- **Perfect for topdressing** to give a **Professional Appearance!**

Item # 434508: Turface Pro-League

Item # 434525: **NEW! Heritage Red** Pro-League

- **Helps Turf Survive in High Traffic** areas, mid-sized, consistent particles
- **Prevents Compaction**, use in root zone to add porosity.
- **Increases drainage** as a result of balanced air & water pore space

Item # 434505:
Emerald Field & Fairway

TURFACE BY THE TRUCKLOAD

23 - 24 Tons, or a truckload of Turface at the beginning of the year can save many headaches over the course of the entire season. Our recommendations are designed to provide optimal results and the ultimate level of protection for your turf. You will see improvement in one single application!

FOOTBALL Fields: 23 Tons

SOCCER Fields: 24 Tons

HOW MUCH TURFACE DO I NEED?

Skinned Areas, Tilled 4" Deep

Regulation	Baseball* (In Tons)	Softball (In Tons)	Little League* (In Tons)
High Clay	15	12	5
High Sand	10	9	3
High Clay Content	1-1/2 tons of TURFACE MVP per 1,000 Sq. Ft.		
High Sand Content	1 Ton of TURFACE MVP per 1,000 Sq Ft.		

* Assumes grass infield; double the amount if completely skinned

Other Applications

Regulation	Baseball* (50# Bags)	Little League* (50# Bags)
Pitcher's Mound	1 - 2	1
Home Plate	1 - 2	1
Base Paths	1 - 3	1 - 2

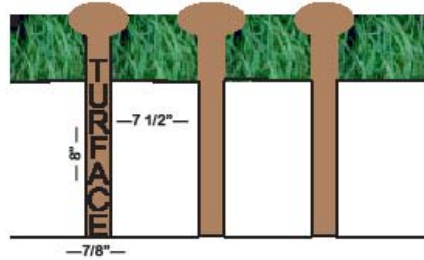

* Rake or nail drag into the surface area

AERATION & SOIL AMENDMENT

“DRILL -N- FILL” Instead of Complete Field Renovation

- Play resumes on field immediately
- Breathes new air into a compacted field

Gives grass the missing component for growth: oxygen
Maximizes performance & Safety

7/8" X 8" holes are filled to the top with TURFACE®. One pass of the Drill-N-Fill machine covers 25" x 60"

CALL YOUR Certified Turf Specialist TODAY
 FOR DEMONSTRATIONS & PRICING

MAXIMUS

by DryDect

The Revolutionary New Contracted Service for
Deep Aeration & Instant Fill

Bigger Nozzle!

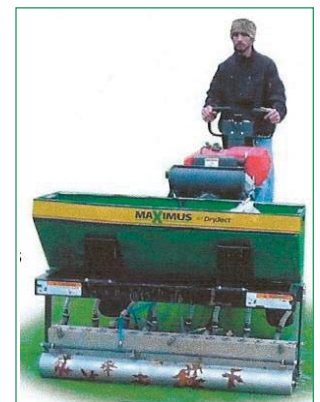

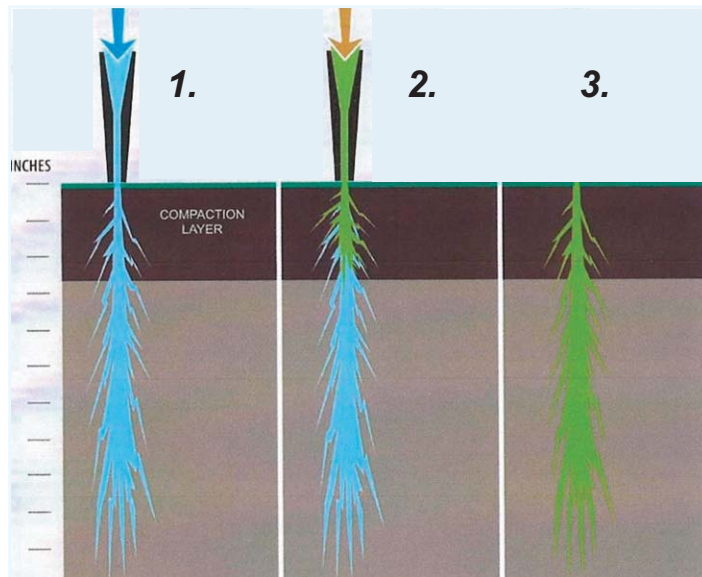

Injects about 2.5 ton of material per hour

More Pressure!

Aerates and fills 9" - 11" deep, 5" x 6" spacing

In the diagram to the Right...

1. High pressure water blasts an aeration hole in the root zone, shattering action relieves compaction
2. Dry material is drawn into the hole by a patented vacuum effect created by the water blast
3. In a fraction of a second, the root zone is aerated, soil amendment fills the hole completely and the surface is ready for play!

THE PITCHER'S MOUND, PROFESSIONAL INSTALLATION

MOUNDMASTER® Blocks & Professional Mound Clay

These two products are made from virgin packing clay without any additives to diminish quality. The clay's degree of plasticity provides the best footing and wear resistance, allowing it to stand up to the intense activity at the pitching mounds and batter's/catcher's boxes.

By building and maintaining your pitcher's mound with MoundMaster® Blocks, you are providing your athletes with safe and consistent playing surfaces pitch after pitch!

Mound Installation Sequence

<p>Caring for Materials</p> <p>When not in use, store blocks under a damp towel or burlap sack, keep in plastic covering.</p> <p>This will keep your TURFACE® MoundMaster® blocks moist and workable.</p> <p>Avoid storing in direct sunlight and keep from freezing.</p>	<p>Outline your landing areas and plateau using a mound gauge to obtain the desired slope. Excavate 3" below the surface, Level and tamp firm.</p>	<p>Excavate the landing area and be 10" wider and longer than the longest stride of your pitchers. Blocks should be within a 1/2" of the surface.</p>	<p>About The Blocks</p> <p>TURFACE® MoundMaster® blocks are made by forming high quality packing clay into easy to use blocks.</p> <p>Blocks provide excellent durability and stability for your mound and batters box.</p>
	<p>Wedge the blocks into position. Keep the tops 1/2" below the rubber.</p>	<p>Tamp and water thoroughly several times for about an hour. Allow water to be absorbed into clay so blocks swell.</p>	
	<p>Fill around blocks with adjacent soil and tamp to wedge together.</p>	<p>Apply a thin layer of Professional Mound Clay (PMC), Moisten and tamp.</p>	
<p>Rake MVP and infield mix over the surface and hand drag.</p>	<p>To repair, cut up blocks or use (PMC). Sweep out hole to expose packing clay, moisten, then add repair clay.</p>	<p>Cover your mound with a plastic tarp to hold moisture.</p>	

How Much Do I Need?

Pitcher's Mound Applications

Approximate Number of Blocks Needed

Area	Full Size	Reduced
Plateau	53	46
Landing Area	111	91
Total Blocks	164	137

Batter's Box Applications

Approximate Number of Blocks Needed

Area	Full Size	Reduced
Batter's Box	216	126
Catcher's Box	75	36
Total Blocks	291	162

Pitcher's Mound Application By the 50lb. Bag

Approximate Number of Bags Needed

Table	4" depth - 11 Bags
Landing Area	4" depth - 20 Bags
Batter's Box	4" depth - 38 Bags
Catcher's Box	4" depth - 13 Bags
Total	4" depth = 82 Bags

Number of bags may vary depending on the size of the mound.

One pallet contains 40 bags. One bag covers 5 square feet x 1" thick (compacted).

THE PITCHER'S MOUND: WHAT YOU'LL NEED

Item # 434278

**Turface
Mound Master®
Blocks**

**304 Blocks/Pallet
packed in 8 block
sealed bags.**

Made by forming high quality packing clay into blocks that provide excellent durability and stability to your mound or batter's box.

- **Same High Quality Clay** that is used in MoundMaster® Blocks
- **Loose - Packed, Shredded Clay**, is easily worked into place
- **Provides firm constant surface for Player's Sure Footing!**

Forged 16-tine
16 1/4" head

60" Hardwood
Handle

Item #437475

THE INFIELD & INFILL MIX

WHAT IS AN INFIELD MIX?

All soils consist of sand, silt and clay. The infield mix is the combination of these components plus any conditioners or additives. To understand how your mix works you need to understand the components.

100% sand is loose, dry, free flowing and drains well. It will produce an unstable and unpredictable surface. With the right amount of water it will be firm and playable but forgiving, allowing for sliding and clean ball hops. Consider a beach where the water meets the shore. This area would make a very playable surface.

Silt & Clay have opposite issues. Drainage is poor so water puddles creating slippery areas and rain-outs. When clay and silt get too dry they become rock hard increasing the probability of injury. But, if kept at the right moisture level and properly groomed, clay & silt are very stable and wear resistant making them ideal for high impact areas.

Water Management is Critical for a Safe Playable Field No Matter What the Soil Mix!

Knowing the make up or composition of your infield mix will help determine a baseline from which maintenance practices can be developed. A [sand, silt, clay analysis](#) can be performed on your field by your **Conserv FS Certified Turf Specialist**. See page 1 for a listing of Specialists and locations.

How Much Do I Need?

TURFACE MVP APPLICATION RATES TILLED 4" DEEP

Skinned Area:

Regulation	Baseball* (in tons)	Softball (in tons)	Little League* (in tons)
High Clay Content	15	12	5
High Sand Content	10	9	3

High Clay Content 1-1/2 tons of TURFACE MVP per 1,000 Sq. Ft.
High Sand Content 1 ton of TURFACE MVP per 1,000 Sq. Ft.

* Assumes grass infield; double the amount of Turface if completely skinned.

Other Turface Applications:

Regulation	Baseball* (50lb. Bags)	Little League* (50lb. Bags)

THE INFIELD: WHAT YOU'LL NEED

Heavy Duty Drag Mat

Specially engineered 6' lead bar to shave off high spots and fill in low areas in front of your finish drag. Will take heavy use behind a tractor, yet it is light enough to be pulled by hand. 40" long, complete with 72" lead bar and pull rope. (= No Bar)*

	W x L		W x L	
Item #:	435415	6' x 3'	Item #: 435420	5' x 3'
* Item #:	435417	6' x 3'	* Item #: 435418	8' x 6'
Item #:	435421	6' x 6'	Item #: 435419	8' x 6'

Need a larger size? Ask your CTS!

* No Bar

Nail Drag

Use to incorporate **TURFACE® MVP** conditioner into the top 1 1/2" to 2" of your infield mix.

Item # 435425

Kenyon Ball Field Rake II

- Ideal for spreading dirt, gravel & sand
- Heavy-duty aluminum head with bolted braces
- Form-fit wrap-around brace connection to handle

Item#	Size
437084	24"
437086	36"
437088	48"

Earthway 2170 Spreader

- Large 13" x 4" Pneumatic Stud Tires
- High Volume 70/100 lb Hopper

Item#: 439316

Lawn Rollers

The unique design on four of the individual rollers permits quick-flip handle/hitch conversion: Remove wing nuts and bolts, flip other way, and replace bolts to wing nuts. It's versatile so rollers can be hitched to tractors for larger expanses of lawn or flipped to push handle for maneuvering close to foundations and ornamentals. *Non-stock item, please call for availability & pricing.*

- Item#: 437019, 18" x 24"
- Item#: 437025, 6' Gang Combo
- Item#: 437021, 24" x 48"
- Item#: 437027, 18" x 48"
- Item#: 437028, 12" Gang Combo

Tow Behind Drop Spreader # 6504

4-ft spreader with tractor hitch & pneumatic tires on steel rim

- Precision matched bottom & slide with spread plate
- Distributes product evenly over turf
- Secure weather-tight cover, keeps the elements out
- Approximately 260-lb capacity

Item # 439402

36" Drop Spreader - Push Style

These models are easy to maneuver around ornamentals and small lawns areas with push handles

- Holding approx. 120 pounds of material
- Corrosion resistant stainless steel bottom, snaps off for quick cleaning
- All parts are replaceable

Item # 439055

FIELD MARKING SYSTEMS

Original Hollywood Bases®

- Major league base design
- Modular design for replacement of worn parts.
- Natural rubber cover with steel stanchion.

- Creates excellent seed to soil contact

Item #430795

BaseRunner Rake

- Telescopic handle that adjust from 39" - 79"
- High Grade Aluminum designed for Sports industry

Item #431019

Roller Squeegee 36"

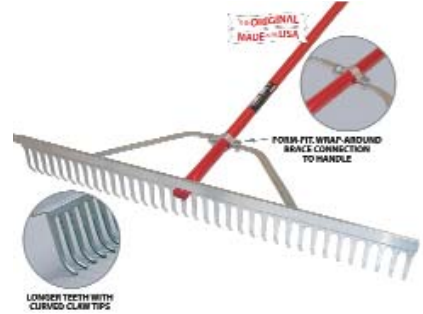

Pushes water off of infield, tarps, tennis & basketball courts!

Item #437026

Ball Field Great Rake II

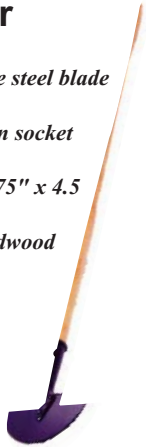

This Heavy Duty Field Rake has dual action design and includes large culling teeth on one side for scarifying and a rugged leveling blade

Item#	#437084	#437086	#437088
	24"	36"	48"

Base Line Edger

- 12 gauge steel blade
- Cast-iron socket
- Head 8.75" x 4.5"
- 48" hardwood handle

Item #438255

EZ Reacher Pro

- Premier tool for Sports Fields
- Made of anodized aluminum, stainless steel & high strength ABS plastic
- Replacement cups available

32" 437206
40" 437208
60" 437207

Replacement cups (Item# 437209)

EZ-DUZIT Scuffle Hoe

- For cutting weeds & aerating in most soils
- 1" x 6" double-edged steel blade
- 54" Hardwood handle

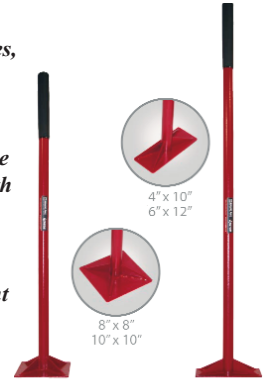

U#68730

Item #438248

Tamps

- No more broken handles, solid welded steel construction
- Designed for rugged use with maximum strength and even tamping
- The smaller 4"x10" tamp is perfect for tight spaces and trenches and comes with a 60" handle and 12" vinyl grip

Item #437244	#437245	#437243
8x8	10x10	4x10

Dead Blow Hammer

Item #438399

TOOLS & MORE

Conserv FS LR30 Open Back Industrial Round Point Shovel

- Front turn step
- Head size 2
- Black head color
- 48" hardwood handle
- Extended tab socket

Item #437476

Square Point Transfer Shovel

- For transferring heavy rocky material

KIFCO: DESIGNED TO MAKE PORTABLE IRRIGATION EASY!

Kifco Water-Reels® are designed to make portable irrigation easy. The machines are simple to operate and provide efficient irrigation over a wide variety of applications. Water-Reels® are compact, highly mobile and offer many benefits. They are ideal for irrigation areas to 35 acres.

When natural rainfall fails to provide adequate water, irrigation will prove to be beneficial

- Athletic Fields will have a better looking - improved playing surface
- The enhanced playing conditions will greatly *reduce the risk of player injuries* due to ground contact
- Simple - Operates unattended with automatic shut-off, often from municipal water supply
- Compact and highly mobil, *excellent low-cost alternative* to built-in or solid set systems
- Horse Arenas will have better dust control and offer a softer, more consistent footing

The Kifco Water-Reel® Advantage

CONSERV FS IS AN AUTHORIZED KIFCO DEALER
Repair Parts Available

Conserv FS

carries a wide assortment of irrigation accessories. From adapters to valves we can help you with all your irrigation needs.

High School Soccer Field Diagram

BASEBALL FIELD SPECS

Field Orientation:

Align the field so that the pitcher is throwing across the sunrise/sunset line.

Step 1: Triangulate The Backstop

If there is no backstop, position the apex of the home plate in an appropriate spot. For positioning the apex of home plate using an existing backstop, start from one outside corner of the backstop and run a string or tape measure out to a couple of feet past where you think the pitching rubber will be. Scribe an arc. Repeat this process starting from the second post, making sure the second string or tape is the same length as the first.

Next, measure and locate the center of the backstop. Extend a straight line from this point out to where the arcs intersect. Position the apex of home plate on this line, and depending on which type of field, a prescribed distance from the backstop.

Recommended distance from backstop to apex:

- 20' for Shetland and Pinto League (50' Field)
- 20' for Mustang League (60' Field)
- 25' for Little League (60' Field)
- 30' for Bronco League (70' Field)
- 40' Pony League (80' Field)
- 25' for Softball (60' Field)
- 60' for Baseball (90' Field)

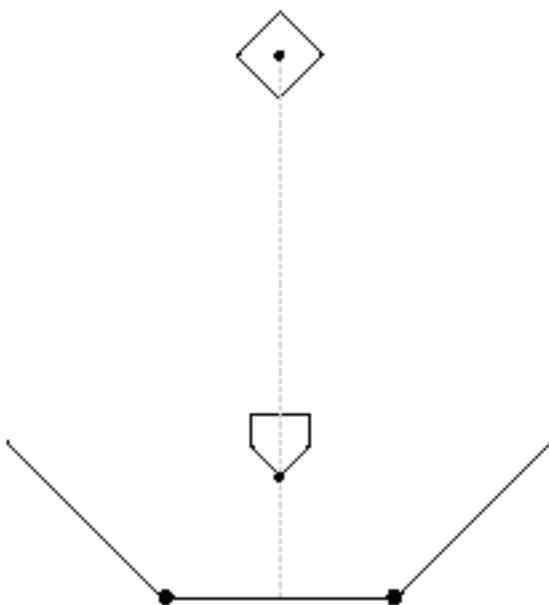

Step 2: Locate Second Base

Run a line from the center point on the backstop, through the apex and over pitcher's mound to place second base on center. The distance to measure is from the apex of home plate to the center of second base.

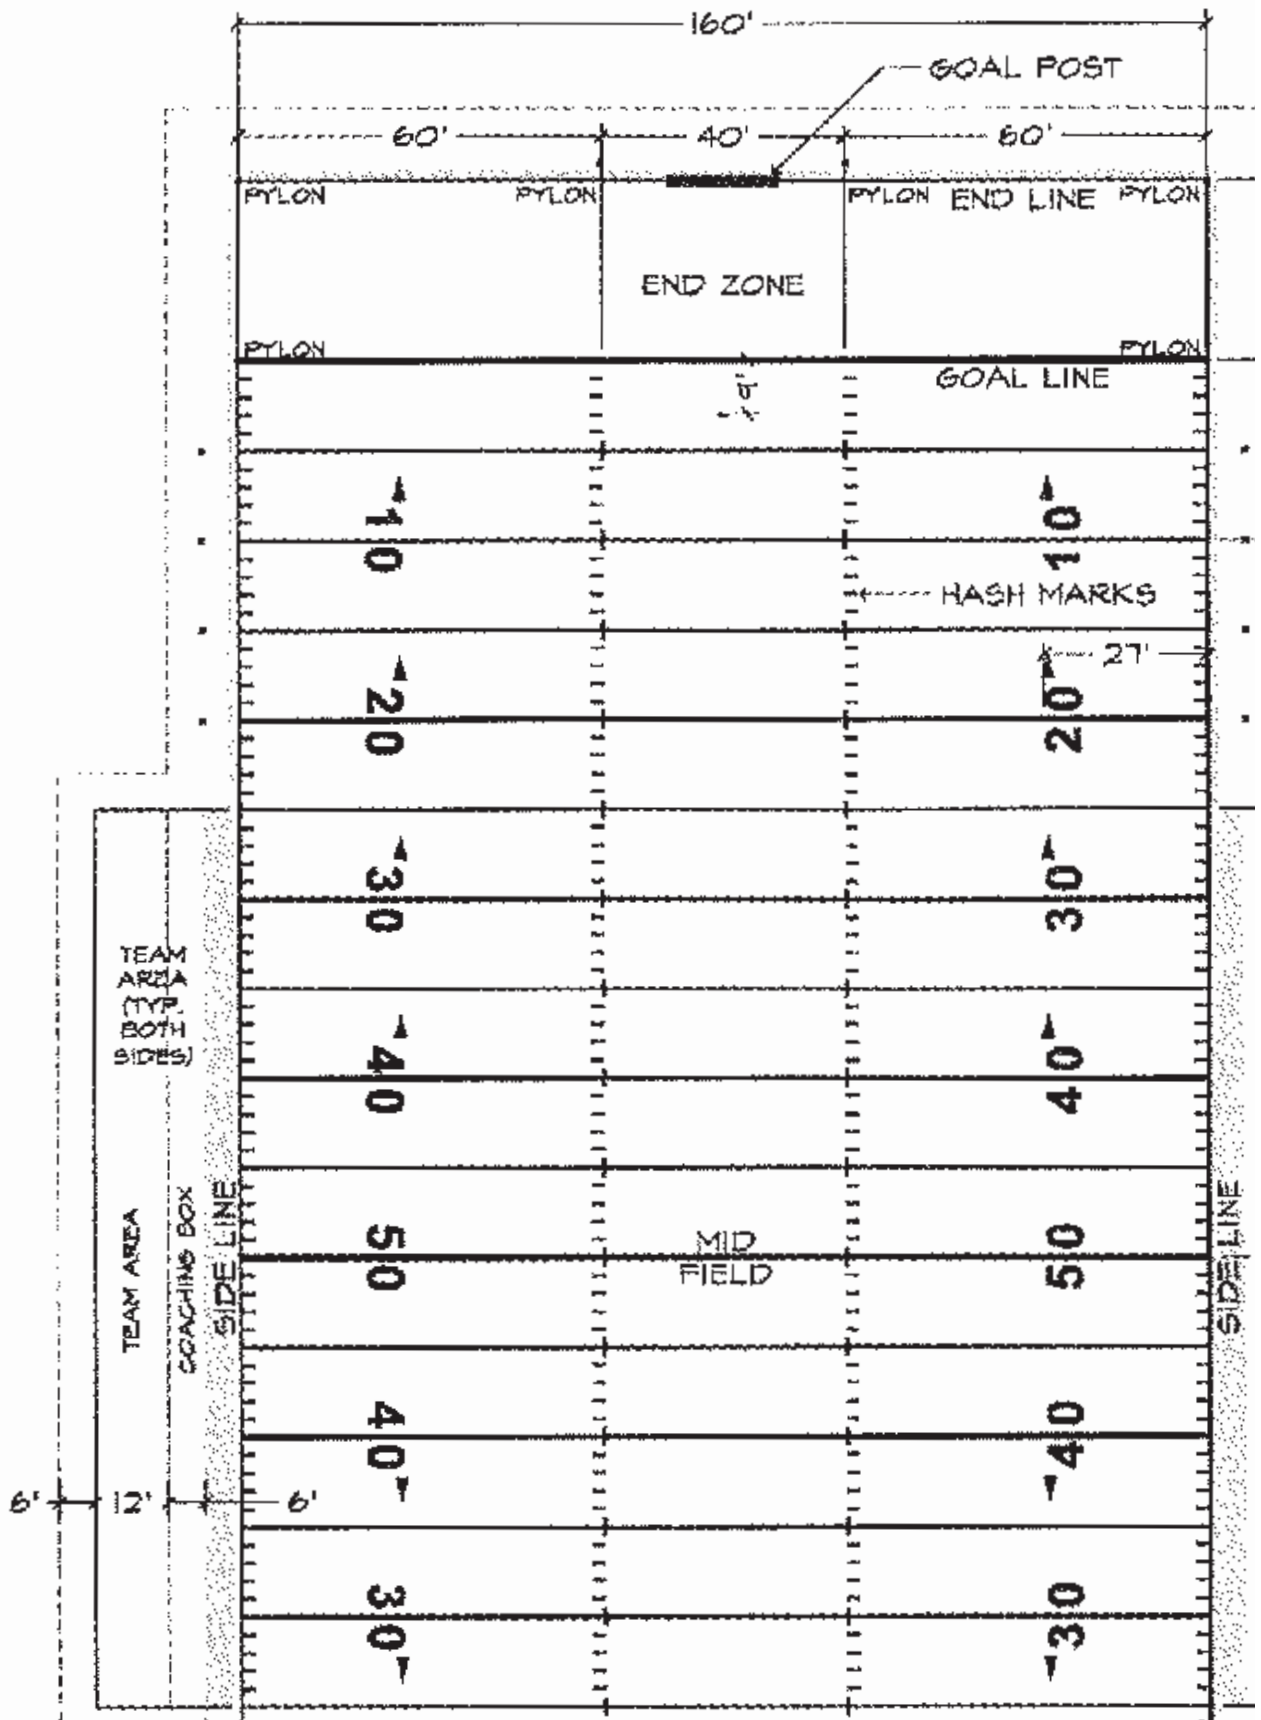

Distance from apex to center of second base:

- 70' 8-1/2" for Shetland and Pinto League (50' Field)
- 84' 10" for Mustang League (60' Field)
- 84' 10 1/4" for Little League (60' Field)
- 99' for Bronco League (70' Field)
- 113' d" for Pony League (80' Field)
- 84' 10 1/4" for Softball (70' Field)
- 127' 3 3/8" for Baseball (90' Field)

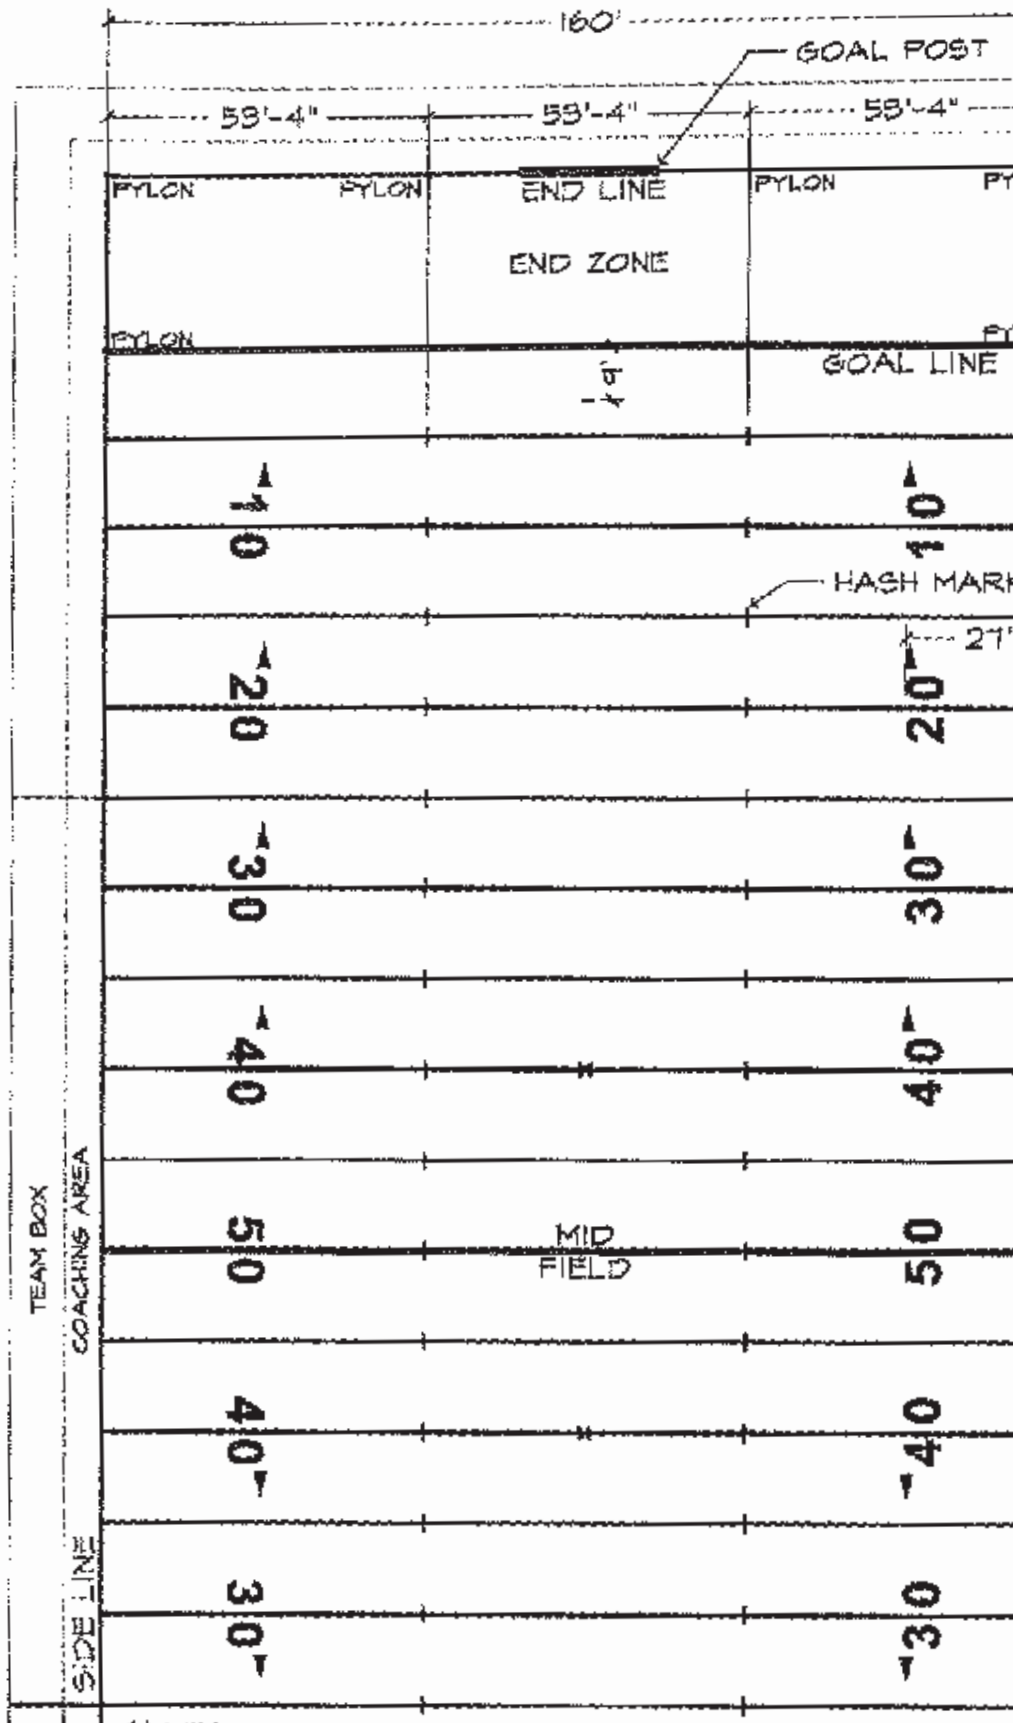

(These measurements are identical to the distance from the outside back corner of third base to the outside back corner of first base.)

PROFESSIONAL SOLUTIONS

There is an industry benchmark for professionalism that you can count on! A way to separate a mere vendor from a valued business partner, and a salesperson from a true resource. This mark of excellence is called the **Certified Turf Specialist**, or **CTS** Designation, a trademark of true professionalism. This year, we brought this expertise to our customers through programs like the ones listed below.

Professional Field-Prep Events

Sports Turf Training

Soil Testing Options

A Talk on Golf Turf

Weed Management Programs

Wrigley Field Training Day

Fertilization Mgmt Programs

Snow & Icemelter Education

Landscape Profitability Seminar

Riverhawks Training Day

For an invitation to participate contact your Conserv FS Product Specialist or, e-mail your topic of interest to: kschumacher@conservfs.com

Consulting Services

When developing a sports complex, many things need to be considered in order to maximize the experience for the entire organization. Important considerations often get overlooked. Our experience has shown us what works and what can end with disastrous results.

CONSERV FS' consultants work with architects & maintenance staff to design the best possible playing surface along with maintenance plans that work. The development and construction of optimal playing surfaces take into account, among other things:

- **Appropriate drainage**
- **Soil amendment selection and depth analysis**
- **Current medium evaluation (on and off site)**
- **Growing and fertilization procedure evaluation**
- **Field usage planning**

- **Particle and soil structure**
- **Selection and depth of growing medium**
- **Grass seed cultivar selection**
- **Irrigation needs**
- **Managing budgetary constraints**

Additional Services

Established in 1928, CONSERV FS has a long history of Agronomic and Turfonomic Expertise.

In order to serve our customers, we maintain numerous affiliations with leading turf educators such as the University of Illinois, Iowa & Wisconsin, Michigan State, Purdue University and many others. Our **Certified Turf Specialists** prepare integrated nutrient, weed and pest management plans, and assist with preferred management practices. Get to know your **CTS** better and find out how working with Conserv FS can make a difference!

NOTES:

What does my field need?

What do I want to ask my Turf Specialist?

Host a Field Training Day at Your Facility!

Each & every turf field is different, you know the challenges you face better than anyone else.

Talk with your **Certified Turf Specialist** to see if problem solving these tough spots is a potential training topic. If so, and if you are willing to share your grounds so that others can learn, we would be interested in talking with you.

Contact: Kimberley Schumacher at 815-334-5942

You are the MVP
And the Game Hasn't
Even Started!

Certified Turf Specialist
