

As we all know, acreage for dry beans was down significantly in the major dry bean categories. Further challenges included excessive hot, dry spells that drastically reduced yield potential. As the 2026 Crop harvest comes to a close, most dealers remain hopeful we will have enough beans to last until next September, as higher prices tend to ration supplies. Our next challenge will be increasing acres in the spring to rebuild reduced carryover stocks depleted by traditional domestic and export demand for 2026 Crop beans.
